Professional Summary

AI-focused Information Science and Engineering undergraduate with hands-on experience in Machine Learning, Natural Language Processing, Computer Vision, and Voice Technologies. Skilled in Python, Java, SQL, and MongoDB with experience building intelligent applications for accessibility, financial advisory, and automation. Passionate about Enterprise AI, Analytics, and Decision Intelligence with a strong problem-solving mindset and commitment to continuous learning.

Education

New Horizon College of Engineering — Bengaluru, India
Bachelor of Engineering (B.E.) in Information Science and Engineering — *2023 – 2027*
- CGPA: 8.72/10

Sri Chaitanya Techno PU College — Bangalore, India
Class XII (CBSE) — *2022 – 2023*
- Percentage: 74.5%

Sri Chaitanya Techno School — Bangalore, India
Class X (CBSE) — *2020 – 2021*
- Percentage: 78.2%

Projects

Multilingual Conversational Loan Advisor | *Python, AI, NLP, Voice Processing*
- Developed an AI-powered multilingual virtual assistant providing personalized loan guidance through voice and text interactions.
- Implemented NLP techniques for intent recognition and context-aware financial recommendations.
- Integrated speech-to-text and text-to-speech modules to enhance accessibility and user engagement.
- Designed scalable workflows for loan eligibility assessment and financial literacy support.

Interactive Auditory Scholastic Chatbot System | *Python, AI, NLP, Accessibility*
- Built a voice-enabled educational chatbot tailored for visually impaired learners.
- Implemented speech recognition and audio response systems for hands-free interaction.
- Developed adaptive conversational workflows capable of answering academic queries in real time.
- Applied accessibility-first design principles to improve inclusive learning experiences.

Smart Waste Management System | *HTML, CSS, JavaScript, Python, MongoDB, AI*
- Developed a full-stack platform promoting effective waste segregation and sustainable disposal practices.
- Built a responsive frontend using HTML, CSS, and JavaScript with an intuitive user interface.
- Implemented a Python backend integrated with MongoDB for user and waste classification data management.
- Trained an AI model achieving over 85% classification accuracy for waste categorization.

Technical Skills

Programming Languages: Java, Python, C, C++, HTML, CSS
AI & Data Science: Machine Learning, Natural Language Processing, Computer Vision, NumPy, Pandas
Databases: MySQL, MongoDB, Cassandra, Redis, Neo4j
Tools & Platforms: Git, GitHub, VS Code, IntelliJ IDEA, PyCharm, SAP, DevOps
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Achievements

- Secured 2nd Place in Code CraftCoding Competition.
- Filed a Patent for an innovative mini-project solution.
- Maintained a CGPA of 8.72 in Information Science and Engineering.
